“Pilot Duties and Aviation English” Sharing session -- *Calling for participants!*

Pilots do not only have a passion for flying and the ambition to develop a career in aviation, but also bear the responsibility of the operation of the aircraft, the safety of the passengers and crew members, and all flight decisions once in the air. They must maintain a highly professional image in both conduct and personal appearance, and communicate with the passengers and crew during flights. In order to improve air transport safety, the International Civil Aviation Organization (ICAO) has introduced the English language proficiency standards which outline the minimum level of English language proficiency required by pilots involved in international operations. Have you ever wondered what exactly a pilot does in his/her daily routine? Are there any hints and tips to improve your English in the aviation context? Join the sharing session jointly organized by AE Wg and VQU with details below:

Date:	18 April 2019 (Thursday)
Roll call:	1930hrs
