HKIAA Aviation Summer Day Camps 2023

Are you ready to explore the behind-the-scenes glimpse of the aviation industry this summer? Don't miss out the limited tickets for the Aviation Summer Day Camps organised by the Hong Kong International Aviation Academy (HKIAA)! Aviation Summer Day Camps are the HKIAA's summer highlights and bring aviation enthusiasts aged 14 or above a fun learning journey at the Hong Kong International Airport. In addition to acquiring fundamental aviation knowledge, participants will also visit different spots at the airport and learn more about insider tips and experts' sharing. In one of the day camps, instructors from our Corps are invited to coach participants with aviation fundamental knowledge, in particular in the professions of pilot, air traffic control, aircraft engineering and aircraft services, through a series of site visits. Applications are now invited! Details are as follows:

Dates:	July/Aug 2023
Selected Camps:	<p>1. Aircraft Engineering Summer Day Camp: This three-day camp aims to encourage participants to pursue the aircraft engineering profession through a series of activities, including classes in engineering principles, aircraft B767 walk-around, aircraft model fabrication and site visits (e.g. HKIA airside and maintenance area, aircraft maintenance facilities).</p> <p>2. Cabin Crew and Ground Services Summer Day Camp: This two-day camp inspires participants to pursue a future career as cabin crew or ground services staff. Participants will learn more about insider tips through a series of specialist talks and experts' sharing. Site visits to the HKIA terminal and airlines training centre will be arranged to offer participants a better understanding of the services at the check-in counters, passenger boarding gates and in-flight.</p> <p>3. Piloting Summer Day Camp: This three-day camp aims to inspire participants to become pilots. In addition to acquiring fundamental flight principles (in particular lift and basic aerodynamics, aircraft structure and aviation communications terminology), participants will also join interactive activities including flight planning, emergency exercises, flight simulator and site visits (e.g. HKIA airside) to enhance their learning experience.</p>
